APARTMENTHAUS TRAUNGASSE 12, VIENNA

Just south-east of the centre of Vienna, surrounded by green spaces and historic buildings, the Apartmenthaus am Belvedere offers the highest quality of life.

The residence is embedded in the middle of the magnificent buildings along the Ringstraße, the Lower Belvedere, and the other spectacular buildings from the Gründerzeit in the adjacent streets.

The three fronts with the curved façade lend the apartment house a unique appearance and integrate it beautifully into its surroundings. The former commercial building has been completely redesigned and planned to the highest standards. A pressure ventilation system from PICHLER, which optimally adapts to the setting and underscores the aesthetics of the architecture, was a natural choice.
