

OBJECT OF THE MONTH

HELIX, SALZBURG

Helix will become the new architectural landmark on the A1. The combination of ultra-modern business spaces with excellent restaurants, a top-class international hotel and state-of-the-art fitness facilities creates a new generation of working and living space.

The multi-functional business building meets the strict requirements of the EU taxonomy regulation. In addition, Helix is "ÖGNI Gold" pre-certified. As a consistently future-oriented project, it meets the highest sustainability standards in the areas of ecology, economy and socio-cultural

Other highlights of the building include:

- Modern cooling, ventilation and shading systems
- Building technology with the highest standards of ecology and cost-effectiveness

Maximum comfort was the focus of all planning right from the start. All PICHLER system components such as air outlets, fans, ducts and fittings ensure excellent air distribution in the interior. The coordinated individual components are the key to an energy and cost-efficient ventilation system.
