

# OBJECT OF THE MONTH

## HUTCHISON DREI AUSTRIA

Hutchison Drei Austria GmbH is a Vienna-based telecommunications company which operates an UMTS/HSDPA and an LTE network under the brand „3“ in Austria. In addition to voice telephony, the company focuses on mobile broadband Internet and provides a wide range of multimedia offers.

According to the motto „Eating brings people together“, the telecommunications company provides a modern canteen for its employees in its headquarters. The factory canteen ventilation, which permanently supplies fresh and clean air, is equipped with an energy-saving ventilation system designed by PICHLER.

The roof-integrated ventilation unit offers a clean solution – unlike other designs, the main body and the central ventilation unit virtually merge with each other. The device is integrated into the roof and therefore becomes part of the building envelope.

### DATA & FACTS
