## INTERCITYHOTEL, GRAZ

[www.gbi.ag](http://www.gbi.ag)

The new IntercityHotel in Graz offers comfort of the upper middle class in the 229 rooms on six floors as well as conference rooms, bar and restaurant. In total there are currently more than 40 IntercityHotels worldwide with over 7,000 rooms, mostly in the immediate vicinity of the train stations settled.

### NEW GENERATION OF ROOMS WITH CORPORATE DESIGN AND SUSTAINABLE CONCEPT

The new IntercityHotels are also technologically state-of-the-art. With natural materials and soft colors, a living room atmosphere is intended to convey special individuality and comfort to guests.

The central ventilation units and components designed by PICHLER supply the interior of the hotel with fresh and filtered air from the outside and ensure the hygienic exchange of air. The individual components which complement each other are the key for an energy- and cost-efficient ventilation system.
