SEEPARK WÖRTHERSEE RESORT

Amidst a picture-perfect lagoon on the shores of the Wörthersee, the Seepark Wörthersee Resort - Congress & Spa offers a fascinating combination of business and holiday lifestyles and offers its guests an impressive panoramic view of things. The architectural challenge of this unique location between nature and an urban space, and the complexity of a hotel project with its various functions – a place for contact and communication as well as intimacy and retreat – have all influenced the design of the Seepark Wörthersee Resort. This superior four-star hotel, a visual masterpiece by Trecolore Architects of Annenheim, was completed after only thirteen months of construction.

With 142 rooms and suites, a hotel restaurant and a 900 m² Move & Relax area, this relaxation and seminar centre with its sophisticated ventilation system is now complete. The feel-good ambience and comfort for the hotel guest is also reflected by an optimum ventilation concept. Coordinated components from PICHLER ensure fire protection as well as perfect room climate.

DATA & FACTS

Location: Klagenfurt am Wörthersee

Completion: 2009 | rebuilding 2021
