## VIENNA AIRPORT OFFICE PARK

The new landmark of the Vienna Airport Office Park was built in a place where it attracts attention from everyone: directly at the entrance to Vienna Airport. The structural component for the Vienna Airport Office Park has enriched the Airport-City Vienna by another visionary business concept. The new building opens up a variety of new and interesting possibilities to companies.

The exciting architecture reflects its futuristic basic concept. The Vienna Airport Office Park has been constructed following the principles of sustainability and taking the most recent findings of construction physiology into consideration. The air-conditioning systems and building technology meet maximum standards.

The energy-saving ventilation concept including fire protection is based on various components from the PICHLER product range, ensuring pleasant air and more comfort in the office premises.

### DATA & FACTS
