

OBJECT OF THE MONTH

YOU!FIT, ST. VEIT

Following the construction of the YouFit fitness studio in the former Hagebaumarkt store in St. Veit, the new health center officially opened its doors at the beginning of 2023 under the chosen name „Vituskraft - Körper.Bewusst.Sein“. The fitness studio on the floor above was extended by a 600 m² area.

Due to the room height of 4.25 meters, the VERSO RHP Pro 2 ventilation unit with integrated heat pump was installed directly on the ceiling to save space, along with all the associated components, such as ducts and fittings from the PICHLER range. This means that the gym is permanently supplied with fresh air with minimal energy consumption. The interior spaces can be heated efficiently, especially during the transitional period, and cooled in summer. Variable-speed compressors are used in the RHP Pro 2. The biggest advantage of the compressors is their flexibility. The rotation speed of the compressor varies so that energy consumption is reduced and temperature changes are minimized.

DATA & FACTS

Location: St. Veit an der Glan

Completion: 2024

Building technology: Pachlinger GmbH

Products: Ventilation unit VERSO RHP, valves, ventilation grilles, silencers, 150 m² ducts & fittings

Product groups:
